

## Product Liability

We are not just litigators, we are trial attorneys. Our attorneys have tried literally hundreds of cases and have received national recognition for our results. Our trial experience, along with the depth and breadth of our practice, will give you and your company the advantage.

To learn more about our experience and the jurisdictions in which we regularly practice, please click on this link: [Experience](#)

No attorney can defend a product liability lawsuit adequately without a thorough understanding of your company's products and their uses. At Schnader, we have experience with a wide range of products, such as automobiles, chemicals, consumer products, industrial equipment, medical devices, and pharmaceuticals.

The breadth of our practice has allowed us to formulate teams addressing the products that matter to you most. Our teams include:

*Asbestos Defense*

*Food Preparation Equipment*

*Aviation Products*

*Heavy Construction Equipment*

*Building Materials*

*Industrial Equipment*

*Consumer Products*

*Pharmaceuticals and Medical Devices*

*Crane and Aerial Devices*

*Solar Panel Generation*

*Electrical Equipment*

*Tools*

In addition, our Product Liability Practice Group has teamed up with Schnader's Environmental Practice Group to create a multi-disciplinary **Toxic Tort Team**. Our team has handled litigation involving innumerable metals, fibers and particulates, solvents, gases, and other chemicals.

Our Product Liability Practice Group also has joined forces with Schnader's Appellate Practice Group, one of the premier groups of appellate attorneys in the country. Clients retain our **Product Liability Appellate/Post-Trial Team**

when faced with an adverse verdict or the prospect of an adverse verdict or to defend successful verdicts. If brought into the case prior to an appeal, our Appellate Team can help with the preservation of issues and establishing a complete record.

The breadth and depth of our experience allow us to provide our clients with the best possible service in an efficient and cost-effective manner.
